Corporate Presentation- Finland Lithium Project

November 2025

All information contained in this presentation is derived solely from management of European Energy Metals Corp. and otherwise publicly available third-party information that has not been independently verified by the Company. Further, the Company does not make any representation as to the completeness, truth or accuracy of the information contained in this presentation. The Company expressly warns readers not to rely on the information contained herein as advice (legal, financial, tax or otherwise) to current or potential investors. This presentation does not constitute and should not be construed as either a public or private offer to sell or the solicitation of an offer to purchase securities of European Energy Metals Corp. in any jurisdiction in which such offer, solicitation or sale would be unlawful.

This presentation contains "forward-looking information" and "forward-looking statements" under applicable Canadian and U.S. securities laws (collectively, "forward-looking statements"). These statements relate to future events or the Company's future performance, business prospects or opportunities that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management made in light of management's experience and perception of historical trends, current conditions and expected future developments. Forward-looking statements include, but are not limited to, statements with respect to exploration activities at the Company's projects and the possible results thereof and the market and demand for lithium. Assumptions may prove to be incorrect and actual results may differ materially from those anticipated. As such, readers are cautioned not to place undue reliance upon guidance and forward-looking statements as there can be no assurance that the plans, assumptions or expectations upon which they are placed will occur. All statements other than statements of historical fact may be forward-looking statements. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives or future events or performance (often, but not always, using words or phrases such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "forecast", "potential", "target", "intend", "could", "might", "should", "believe" and similar expressions) are not statements of historical fact and may be "forward-looking statements". Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause actual results to materially differ from those expressed or implied by such forward-looking statements, including but not limited to: fluctuations in markets for rare metals; restrictions on mining in the jurisdictions in which the Company operates; laws and regulations governing the Company's operation, exploration and development activities; its ability to obtain or renew the licenses and permits necessary for the exploration of the Projects; risks and hazards associated with the business of mineral exploration; the speculative nature of mineral exploration and development; inadequate or unreliable infrastructure (such as roads, bridges, power sources and water supplies); environmental regulations and legislation; the effects of climate change, extreme weather events, water scarcity, and seismic events, and the effectiveness of strategies to deal with these issues; the Company's ability to recruit and retain qualified personnel; disputes as to the validity of mining or exploration titles or claims or rights; increased competition in the mining industry for properties and equipment; limited supply of materials and supply chain disruptions; relations with and claims by local communities and non-governmental organizations and claims and legal proceedings arising in the ordinary course of business activities. The Company believes that the expectations reflected in these forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included herein should not be unduly relied upon. These statements speak only as of the date hereof. The Company does not intend, and does not assume any obligation, to update these forward-looking statements, except as required by applicable laws.

Geology

A white icon of a rock with a jagged, crystalline shape, set against a dark blue triangular background.

Finland has a unique geology that covers a third of the country, known as the Fennoscandian Shield. This region is rich in minerals such as lithium, cobalt, and nickel, among others.

Political Environment

A white icon of a person standing at a podium, set against a dark blue triangular background.

Finland is known for its stable political environment, which ensures smooth mining operations and low corruption levels, making it an attractive investment destination.

Infrastructure

A white icon of a road with a dashed center line, set against a dark blue triangular background.

Finland provides an excellent infrastructure for mining activities. The country is well-connected to Europe and invests heavily in the transport and energy sectors, ensuring easy access materials.

Sustainability

A white icon of a small plant with two leaves, set against a dark blue triangular background.

Finland focuses heavily on sustainability, with its Government supporting the development of green technologies and ensuring ethical and environmentally friendly mining practices.

European Energy Metals, is focused on the acquisition of assets located in the mining friendly jurisdiction of Finland. Our properties are strategically located near major mining projects including the Keliber Lithium Mine currently under construction. This mine is owned by Sibanye Stillwater (NYSE:SBSW,) and neighbors our central Finland Lithium projects.

In Northern Finland our projects are located along strike with B2Gold (NYSE:BTG), Anglo-America (OTC:AAUKF), Agnico Eagle (NYSE: AEM, and Rupert Resources (OTC: RUPRF) that are situated near our North Finland precious metals projects.

We explore for minerals crucial to the EU's goal of self-sourcing 30% of the critical metals required to fuel its energy transition which includes Lithium. Additionally, our properties leverage the appeal of the world's No. 1 safe haven asset, gold. Our technical team is led by Mr. Mike Basha, a seasoned expert with over 10 years of experience in the district—underpinning a proven track record that includes several significant discoveries.

Jeremy Poirier
CEO

Mr. Poirier brings nearly two decades of capital markets experience in the natural resource and technology sectors. He has served in various senior officer and corporate development roles at exploration mining companies. From September 2016 through December 2019, Mr. Poirier was CEO of Bearing Lithium Corp. and was instrumental in the Company's acquisition of Li3 Energy. Prior to Bearing Lithium, Mr. Poirier held senior roles at Pure Energy Minerals Ltd. and is currently the CEO of European Energy Metals Corp.

Joel Leonard
CFO

Joel is the owner of JCL Partners Chartered Professional Accountants and is a seasoned finance executive with a comprehensive background in the financial leadership of companies listed on various public exchanges, including the TSX, TSX-V, and CSE. Joel holds a Bachelor of Business Administration degree from Thompson Rivers University and is designated as a Chartered Professional Accountant in the Province of B.C. As he steps into his new role with the Company, he looks forward to leveraging his experience and insights to contribute to the Company's financial health and strategic objectives.

Gino DeMichele
Chairman

Currently President and Chief Executive Officer of A2 Capital Management Inc. Previously Vice President and Senior Investment Advisor at Various Canadian brokerage firms. Over 30+ years of finance, public and private equity, merger and acquisition expertise.

Mike Basha
VP of Exploration

Mr Basha is a professional engineer and geologist with over 35 years experience working for major and junior exploration and mining companies in Canada, USA, Mexico, Ecuador and Finland. He has generated and worked on many grassroots to advanced exploration projects for a variety of mineral commodities. He was co-discoverer of the Hammerdown gold deposit in Newfoundland early in his career. As former VP Exploration of Cornerstone Resources Ltd, he was instrumental in helping establish them in Ecuador. Cornerstone was recently acquired by Solgold Plc for \$120 million. He is also the founder and former CEO and President of Aurion Resources Ltd, with assets in Northern Finland. While at Aurion he acquired, primarily through staking, approximately 80 km along the Sirkka Shear Zone, which forms the basis of the Aurion-B2Gold Joint Venture, and which hosts the Helmi Gold Prospect adjacent to Rupert Resources Ikkari Gold deposit. Mr Basha staked the core of Aurion's holdings in Finland and under Mr Basha's direction Aurion exploration teams made multiple discoveries including the high-grade Aamurusko, Launi and Notches gold prospects among others. He negotiated the acquisition of the Kaarelska Project from Tertiary Minerals. He also negotiated the acquisition of the Silasselka Vanadium Prospect from Dragon Mining which was sold to Strategic Minerals. He was also instrumental in bringing B2Gold and Kinross into Finland as Joint Venture partners and investors.

Emerging Lithium Districts

Highlights:

- Sibanye Stillwater (NYSE:SBSW, US\$5B MCap) has commenced construction on the €600M Keliber project and refinery, representing the development of a lithium supply chain in Finland. The Keliber project is expected to commence production in H2/2025 and produce 15,000 tonnes of battery-grade lithium hydroxide (LiOH) annually at a cash cost of €6,750 per tonne over a 16-year life.
- Keliber has already signed several off-take agreements with global customers for its battery-grade lithium hydroxide, including BASF, LG Energy, and Sichuan Yahua Industrial Group, indicating a strong demand for its product.

(Source: Keliber Lithium Project, Finland Technical Report Summary Prepared for Sibanye Stillwater Limited by SRK Consulting (South Africa) (Pty) Ltd. dated 2023-Dec-13 with an effective date of 2022-Dec-31. Note this is the source for all subsequent disclosure on the Keliber Lithium project throughout the presentation, particularly the reserve and resource numbers on slide 9 and slide 10.)

World Class Infrastructure – Central Finland

- Excellent access and infrastructure
- Two regional airports at Vaasa and Kokkola with daily flights from Helsinki or Stockholm
- 5 hour drive on two lane highway from Helsinki
- Or direct 4 hour train to the town of Kokkola

- Properties located in the Pohjanmaa Schist Belt
 - Comprised of
 - Lithium-rich, Meta-Sedimentary Rocks
 - Voluminous S-type Pegmatitic Granites
 - Widespread Pegmatites
- Properties Located adjacent to Keliber Li_Pegmatite Deposits and Mine/Production Complex
 - Numerous Li-Pegmatite Prospects and Deposits in Region
 - **17 Mt grading >1% Li₂O at Keliber**

Infrastructure –Adjacent to Keliber Li Production Complex

The logo for GRIT METALS features a stylized 'G' icon composed of red and blue geometric shapes. To the right of the icon, the word 'GRIT' is written in large, bold, red capital letters, and the word 'METALS' is written below it in bold, blue capital letters.

- Keliber intends to mine from five deposits initially and truck the ore to a central plant to concentrate the lithium-rich spodumene
- Nabba Els are < 10 km to the Keliber Spodumene Concentrator Plant
- If EEM makes an economic discovery it may be possible to ship ore to the Keliber plant for custom milling or sell the project to Keliber

2023 Nabba Highlights

- Several occurrences and/or clusters of Lithium-rich, spodumene-bearing pegmatite boulders discovered
- Best result is KYROLA Prospect
 - 350 long NW- SE Boulder Train
 - 49 rock samples assayed up to 3.84% Li₂O
 - 15 assayed >0.5% Li₂O
 - Local source boulders
 - Mineralization is identical to Keliber

Spodumene-Bearing Li-Rich Pegmatite Boulders

- Li Deposits/prospects in the region are mostly concealed under thin veneer of till
- Deposits have small footprints (<500 x 500 m; Individual Dykes 1-30 m wide)
- Prospecting, boulder tracing and Base of Till (BoT) sampling are effective exploration tools

Geology - Keliber Deposits

Boulders at Keliber Deposits are approximately 300-500 m down-ice from source

- All the Keliber deposits and generally other prospects in the region are concealed under cover
- They were discovered by tracing boulders back to source.
- Most deposits occur 300-500 m "up-ice"

Kyrola Area – Comparison of Keliber Deposits at Same Scale

- All the Keliber deposits and other prospects in the region are concealed under cover and were discovered by tracing boulders back to source.
- They also have a small footprint, generally < 500m strike with individual dykes 1- 30 m wide
- A significant pegmatite swarm could easily be concealed under farm field up-ice from the boulders

New Exploration Licence Applications

- New EL applications submitted in late March
- License boundaries <350 m of known deposits
- EEM will control approximately 10,000 ha in Keliber region
- Gives EEM a Strategic Land Position

- Prelim Exploration Budget CAN\$1.5 million
- Prospecting! Q2-Q3
- Geological mapping Q2-Q3
- Trenching Q2
- Base of Till (BoT) Sampling Q4
- Diamond Drilling Q4

- First year exploration program was a success
- New lithium-rich spodumene bearing pegmatite mineralization discovered on Nabba (3.84% Li₂O)
- EEM granted two new Exploration Licences at Nabba in January
- EEM has submitted new Exploration Licence applications near Keliber/Nabba In March
- EEM has executed a purchase agreement for 100% of the Nabba and Lappajarvi projects (formerly an 80% Earn-in agreement with Capella)
 - Savings of \$150k cash and 1.15 M shares
- EEM controls approximately 10,000 ha in the Keliber area
- 2024 field program to commence on or about Mid-Late May

Tim Hennberry
Independent Director

Mr. Henneberry is a professional geoscientist registered in British Columbia with over 42 years of experience in domestic and international exploration and production for base and precious metals and industrial minerals. Mr. Henneberry has been involved in the management side of public companies for the past 16 years, including: founding, senior management and/or directorships. He currently sits on the Board of multiple CSE and TSX.V companies, while also sitting on the Advisory Boards of others.

Christos Doulis
Independent Director

Mr. Doulis has over 25 years of experience in the metals and mining space having held senior positions in mining equity research, investment banking and in industry. He was an award-winning research analyst at Stonecap Securities and PI Financial from 2010 to 2015. Prior to that Christos was a partner at Gryphon Partners as well as VP Investment Banking (Mining) at TD Securities. Most recently, Christos served as CEO for several exploration companies focused on Western Newfoundland and in Nevada. He holds a Bachelor of Arts in economics from Queen's University.

Jeremy Poirier
Director

Mr. Poirier brings nearly two decades of capital markets experience in the natural resource and technology sectors. He has served in various senior officer and corporate development roles at exploration mining companies. From September 2016 through December 2019, Mr. Poirier was CEO of Bearing Lithium Corp. and was instrumental in the Company's acquisition of Li3 Energy. Prior to Bearing Lithium, Mr. Poirier held senior roles at Pure Energy Minerals Ltd. and is currently the CEO of European Energy Metals Corp.

Gino DeMichele
Director

Currently President and Chief Executive Officer of A2 Capital Management Inc. Previously Vice President and Senior Investment Advisor at Various Canadian brokerage firms. Over 30+ years of finance, public and private equity, merger and acquisition expertise.

Larry Taddei
Director

Mr. Taddei brings seventeen years of experience as a senior executive in the mineral resource industry, culminating in twelve years as the Chief Financial Officer of MAG Silver Corp. where he was instrumental in its growth. His relationships extend to the investment community, playing a lead role in defining capital structure and balance sheet management. He was responsible for all aspects of MAG's financial operations, including treasury, taxation, IT systems, insurance, and risk management. He also played a key role in the company's governance and ESG guidelines, policies, and procedures. Prior to MAG, Mr. Taddei was Chief Financial Officer of West Timmins Mining Inc. until its purchase by a producing major in 2009 for CAD \$ 424 million after the discovery of the Thunder Creek gold deposit. Mr. Taddei is a Chartered Professional Accountant with the Chartered Professional Accountants of British Columbia and an Accredited Director with the Chartered Governance Institute of Canada. He holds a Bachelor of Commerce Degree from the University of British Columbia.

Gold Projects – Central Lapland Greenstone Belt (CLGB)

- 5 Mineral Reservations covering > 300,000 ha
- In Under-explored southeast part of CLGB
- Highly prospective for gold and base metals
- Underlain by geology similar to Ikkari and B2Gold-Aurion JV

1 Year Milestones

March 2023	Execute agreement to Earn-in 80% in Nabba, Lappajarvi, Kaatiala and Lovela Projects
July to October 2023	Field program - prospecting and mapping; multiple occurrences of Lithium-rich, spodumene bearing pegmatite boulders discovered on Nabba
Sept-October 2023	Nabba and Nabba 2 ELs submitted
January 2024	Nabba and Nabba 2 ELs granted
March 2024	Four New ELs submitted in Keliber/Nabba area
April 2024	Execute agreement to purchase 100% in Nabba, Lappajarvi, Kaatiala and Kovala Projects (savings realized)

Gigafactories in Europe

Highlights:

- Finnish Minerals Group and Beijing Easpring Material Technology have been investigating and negotiating the possibility to establish a **CAM plant** in Kotka, Finland with the initial capacity of 50,000 t/a.
- Freyr Battery intends to build Finland's **first Gigawatt-hour-scale battery cell** production facility and has already initiated an **Environmental Impact Assessment (EIA)** for the project.
- Norway's first lithium-ion (Li-ion) battery factory has taken a key stride toward construction with a **NKr142m (\$16.4)** grant being given to developer Freyr by the **Nordic country's ministry of climate and environment**.

Geology - Kaustinen "Parent" Granite

- Most LCT pegmatite deposits occur within <10 km to a parent granite where a genetic link can be deduced.
- It has been postulated that the Li pegmatites in the Kaustinen region are the differentiated products of the Kaustinen Granite.
- All the prospects in the region all lie within 10 km of the Kaustinen Granite
- There are Li-pegmatite deposits and prospects NW, NE and SE of the Kaustinen Granite"
- The area SW of the Kaustinen Granite is under-represented
- It is also possible that other similar granites in the region are fertile and a possible source for LCT pegmatites

- Magnetic lows may be sites for location of mineralization where a host structure or pegmatite swarm crosses the magnetic high trend
- Pegmatite deposits/prospects elsewhere in the region occur in similar setting, ie at the mafic volcanic contact
- It is also possible that NNW - SSE trending pegmatites lie under a portion of the boulder field

Geology - Keliber Li Deposits at contact with Mafic Volcanics

The pegmatites at Keliber and in the region in general are often associated with Mafic to Intermediate Volcanic rocks. This may be due to competency contrast between the volcanics and the surrounding metasediments. There are two primary orientations of known pegmatites: 1) NNW-SSE and 2) WSW-ENE

- Some deposits in the region occur at the contact between meta-colcanics and meta-sediments
- Mineralization at Kyrola occurs at the contact with meta-mafic volcanics and met-sedimentary rocks
- This represents an exploration tool
